

## Strategies for supporting pupils with Special Educational Needs and Disabilities in Mathematics lessons.

Individual Need	Here's how we help everyone learn
Attention Deficit Hyperactivity Disorder	<ul> <li>✓ A non-confrontational approach will be used in every aspect of the maths lesson.</li> <li>✓ Adult support during the key skills and sessions where children are using whiteboards to record their answers.</li> <li>✓ Verbal praise is given whenever necessary to help boost confidence and self-esteem.</li> <li>✓ Use of pictorial representations to support the learning taking place.</li> <li>✓ Use concrete resources to support new mathematical concepts.</li> </ul>
Anxiety	<ul> <li>✓ A trusting relationship will be nurtured between all adults in the classroom and the child.</li> <li>✓ This relationship will enable the adult to know any triggers or changes in behaviour that may be caused by the child feeling anxious.</li> <li>✓ Giving feedback or answers is always a non-compulsory option during any maths lesson so that children are not 'put on the spot' or made to feel pressured or uncomfortable.</li> <li>✓ Maths lessons are calm and quiet where children can focus on the learning taking place.</li> <li>✓ If children feel overwhelmed by the classroom environment, they can use a quiet break out space.</li> </ul>
Autism Spectrum Disorder	<ul> <li>✓ Visual timetables are used to support the organisation of the maths lesson.</li> <li>✓ Visual cues/resources are used to support the child as necessary throughout the session.</li> <li>✓ A learning space is provided that best suits the child.</li> <li>✓ There is a consistent approach to the maths lesson with any changes discussed with the child beforehand.</li> <li>✓ Sensory breaks are given whenever necessary.</li> <li>✓ Mathematical vocabulary is integrated into the lessonthroughout, with visuals to support new language.</li> <li>✓ Staff avoid asking specific or direct questions that focus on the child's mathematical understanding that may make them feel uncomfortable.</li> <li>✓ Staff ensure that the child has a clear understanding of what they are expected to achieve during the maths lesson.</li> </ul>
	✓ Concrete resources and manipulatives are always made available and are clearly labelled and accessible.

Dyscalculia	✓ Adults will ensure children understand how to use these
	manipulatives to support the specific learning objective.
	✓ If a slideshow is being shown, an individual laptop will be provided
	so the child can follow the presentation successfully.
	✓ Key skills sessions incorporate activities that specifically focus on
	recall and repeating areas of mathematics the children have already
	explored.
	✓ Graph paper can be provided for written calculations (i.e. long)
	division).
	✓ Rulers and highlighters will be used to visually support the
	drawing/organisation of written calculation methods.
	✓ Peer and adult support will be built into the lesson throughout to
	support any corrections with recording dictated numbers/number
	formation.
	✓ Peer teaching will be used as a great way of the child sharing new
	knowledge that has been learnt.
	✓ Different coloured paper can be provided for any written recordings.
/	✓ A text font size of 12 or above is used for any information
/	sheets/PowerPoint presentations
	7 7777 1333 3 3
	Questions will be strott their visual representations (analyanis)
Dyslexia	pictures, illustrations) to support.
	✓ Data, charts and diagrams are clearly organised and structured.
	✓ Specific clear, rounded and spaced out fonts are used on any writing
	within the lesson.
	✓ Large spaces for working out will be provided in a maths book.
	✓ A large learning space will be provided.
1	✓ Instructions can be written out for the child, using
10	different colours for each line.
	✓ Diagrams will be provided before labelling/editing.
Dyspraxia	✓ Children can move around the classroom whenever necessary.
	✓ When using mathematical equipment, an adult or supportive
	peer will provide demonstration of how tosuccessfully use the
	equipment.
	✓ Adults will ensure they are watching closely for signs of distress
	and provide a quiet, calm learning environment.
	✓ A suitable working space will be agreed upon between the teacher
	and child in a safe, private conversation before the lesson.
	✓ Adults within the classroom will ensure the child's hearing
	aid is turned on before the lesson begins.
Hearing Impairment	✓ Adults will ensure they are facing the child when they are
	talking/giving instructions.
	✓ Questions and any information given by peers will be repeated
	clearly to ensure the child has heard what their peers have
	asked/said.
	✓ Children will be seated towards the front of the classroom to ensure

1	they have a clear line of vision, especially during the input where the
	whiteboard will be the main focus.
Toileting Issues	<ul> <li>✓ Children will be able to leave and return to the classroom whenever necessary.</li> <li>✓ A seating arrangement will be made so that the child can enter and</li> </ul>
	leave the classroom discretely.  ✓ All adults and children within the classroom environment will respect the child's privacy.
Cognition and Learning Challenges	<ul> <li>✓ Learning is differentiated to meet the child's specific 'learning gaps'.</li> <li>✓ This will ensure that the task being given to the child matches their individual academic needs.</li> </ul>
	<ul> <li>✓ Concrete resources and visual representations will be given to the child to support any mental and written calculations needed.</li> <li>✓ Self-checks can be used at each stage of a task so that children are aware of the outcome required and their progress in achieving this.</li> <li>✓ Key vocabulary and ideas will be addressed regularly throughout the maths lesson to check understanding.</li> </ul>
	<ul> <li>✓ Information will be repeated clearly, varying the vocabulary used.</li> <li>✓ SMART pages and PowerPoint slides will be simple and uncluttered with key information highlighted.</li> <li>✓ Children will be provided with a 'work-buddy' during peer activities/opportunities.</li> </ul>
Speech, Language & Communication Needs	<ul> <li>✓ Visual timetables, signs and symbols will be used to support communication within the maths lesson.</li> <li>✓ Visual displays (maths working walls) will be used to support understanding of key information.</li> <li>✓ Non-verbal clues will be used to back up what is being said.</li> <li>✓ Any verbal instructions/information will be at a slow, clear pace that matches the child's understanding.</li> <li>✓ Adults will regularly check the child's understanding so that adults can identify any misconceptions or misunderstandings.</li> </ul>
Tourette Syndrome	<ul> <li>✓ Adults will listen and respond to the child with support and understanding.</li> <li>✓ A structure will be provided (tick list) to support the learning taking place, this will be differentiated to the maths activity and include the main elements needed toaid the child's attention.</li> <li>✓ There will be understanding that the activity may not becompleted.</li> </ul>
Experienced Trauma	<ul> <li>✓ The maths learning environment will be a calm, trusting place where children feel supported with their emotions at all times.</li> <li>✓ Adults working with the child will be aware of any triggers and any ways to further support the child within the classroom.</li> <li>✓ There will be a consistent approach to expectations and behaviour that are based on positive praise.</li> </ul>

## **Visual Impairment**

- ✓ Anything that is being displayed (PowerPoint presentation, maths working wall) will be large and easily visible from anywhere in the classroom
- ✓ Children will be able to 'take a break' from their maths learning whenever needed to ensure they are able to focus visually and avoid fatigue.
- ✓ Images and text within any printed work will be enlarged with the recommended font size.
- ✓ Children will be provided with a thicker and darker pencil to ensure their writing is clear.
- ✓ Children may be provided with a larger squared exercise book if preferred.
